

PETE SEEGER: LIVE IN AUSTRALIA

Folk Icons: Pete Seeger is a beautifully filmed 105-minute concert showcasing one of the most provocative figures in music history. In 1963 Pete Seeger, blacklisted and barred from American television, he fled the persecution of his homeland and embarked on a 10-month world tour. One of his first stops was Australia where he was welcomed with open arms and sold-out performances. This DVD not only presents a full concert filmed in Melbourne but also includes 55 minutes of bonus footage from various other Australian television appearances. Witness how one man, armed only with a banjo, a guitar and the power of song, captures the hearts and minds of a nation. Australian perspective booklet notes by Warren Fahey.

SPECIAL FEATURES * Pete singing and discussing the songs of Lead Belly (also features 3 rare performances by Lead Belly filmed in 1945). * Interviews and performances on Australian news programs. * 16-page booklet featuring liner notes by Seeger biographer David K. Dunaway. * Rare photographs, home movies and memorabilia.

Celebrating his 90th birthday this year, singer songwriter Pete Seeger has been a key figure in folk music since the 1940s and recently performed at the 2009 Presidential Inauguration Concert.
